---

PROFESSIONAL SUMMARY

- Professional .NET Developer with 3+ years of experience in building enterprise web applications and data integration solutions. Strong expertise in ASP.NET (C#), Rest-API, and SQL Server**,** with solid experience in designing business logic, database operations, and performance optimization.

- Hands-on experience of 2.4 years in Healthcare domain, where I worked extensively on Hospital Management and Billing Systems, developing modules for patient management, billing engines, payroll processing, dashboards, and financial reports.

- Around 1 year of experience in ETL and Cloud Migration projects**,** specializing in SSIS development and migration of ETL workflows to Azure Data Factory (ADF) using Azure-SSIS Integration Runtime. Experienced in building secure and scalable data pipelines and managing Azure resources such as Virtual Machines, Storage Accounts, and Key Vault.

- Currently working on enterprise ETL data processing and have also contributed to frontend development using Angular. Comfortable working in Agile environments and collaborating with cross-functional teams to deliver reliable, high-performance solutions.

TECHNICAL SKILLS

- **Languages & Frameworks**: ASP.NET, C#, HTML, CSS, JavaScript, jQuery, Web API, Swagger
- **Cloud Technologies**: Microsoft Azure, Azure Data Factory, Azure SSIS IR, Azure Pipelines, Azure VM, Key Vault, Azure Storage
- **ETL & Data Integration:** SSIS, ETL Design, Data Transformation, Data Migration
- **Databases**: SQL Server, Oracle 11g
- **Reporting Tools**: Telerik Reports, DevExpress
- **Version Control/Tools**: GitHub, Visual Studio, Postman, Rally, JIRA
- **Methodology**: Agile (Scrum), Sprint Planning, Daily Stand-ups

---

EXPERIENCE

Employer 1 – Softude Infotech Pvt. Ltd, Indore
Nov 2025 – Present | Software Engineer

Employer 2 – TheRapidHire Pvt. Ltd., Indore
Nov 2024 – July 2025 | Software Developer

Employer 3 – Aarogya Infotech and Management System Pvt. Ltd, Indore
May 2022 – Oct 2024 | .NET Developer

PROJECTS

Project 1: ASAPP Banking ETL Architecture (Nov 2025 –Present)
Role: Software Engineer
Technology: SSIS, SQL Server, SSMS

Responsibilities:

- Developing and maintaining SSIS ETL packages for processing large volumes of financial data
- Performing data transformation, validation, and cleansing before loading into target systems
- Optimizing SQL queries and improving data load performance
- Handling data reconciliation and accuracy checks between source and destination systems

Project 2: MALTSS – Azure Migration (Nov 2024 – July 2025)
Role: Software Developer
Technology: Azure Data Factory (ADF), SSIS, Azure-SSIS Integration Runtime, SQL Server, Azure Key Vault, Azure VM, ASP.NET Rest-API, JWT Authentication

Responsibilities:

- Played a key role in migration of 70+ SSIS packages from on-premise servers to Azure Data Factory (ADF) pipelines.
- Configured and managed Azure-SSIS Integration Runtime (IR) to enable cloud-based ETL execution
- Performed ETL data transformation, validation, and performance optimization during migration
- Designed secure data pipelines and managed credentials using Azure Key Vault
- Worked with Azure infrastructure including Virtual Machines, Storage (Blob), and Resource Groups
- Provided development support on ASP.NET Web API microservices, implementing JWT-based authentication
- Contributed to an Employee Registration module as part of microservices architecture
- Participated in Agile ceremonies and assisted in deployment and release activities using Azure

Project 3: Hospital Resource & Billing Management System (May 2022 - Oct 2024)
Role: .NET Developer
Technology: ASP.NET (C#), SQL Server, Telerik, Web Services, DevExpress, Telerik Reports

Responsibilities:

- Designed and developed hospital modules including IPD, OPD, patient registration, billing, and payroll management
- Integrated pharmacy stock module with the billing system to enable automated medicine charge calculations
- Developed Emp salary calculation logic based on attendance and shift data
- Implemented role-based access control for Admin, HR, Store Manager, Doctors, and Accounts teams
- Integrated doctor and patient portals using Web Services for real-time data synchronization
- Wrote and optimized complex Orecal for backend processing and financial reports
- Generated Telerik, and DevExpress reports for audits, management reviews, and daily summaries
